

Positive Behavioral Practices Policy

At KidzStuff Child Care Center, our goal is to teach children to engage in appropriate behavior that keeps them healthy and safe.

Classroom Rules

With input from the children, each class will develop classroom rules at the beginning of each school year. Classroom teachers and students will create no more than seven classroom rules.

Positive Behavior

The staff will promote acceptable behavior, using positive and preventative discipline techniques:

1. Age-appropriate expectations for children
2. Reinforce by praising and rewarding
3. Develop a consistent set of rules for their developmental level
4. Ignoring misbehavior that is an attempt to get attention
5. Re-direct the child away from the problem causing situation to another activity or toy
6. Allow the children to problem-solve among themselves, providing them with words to use if necessary while staying close by if the interactions become aggressive
7. Positively phrase the directions, telling children what they should be doing rather than what they should stop doing.

Responsive Approach

When necessary, Our Teacher will use positive techniques such as

- Offering Choices
- Redirection
- Reminding children of the rules
- Using reflection and problem solving
- Suggesting alternatives to any unsafe activity
- Use of calming area
- “1, 2, 3, Magic” technique
- Providing choices throughout the day and allowing the children to express their likes and dislikes in a Positive way
- Respond to each child’s individual needs

If the child continues with inappropriate behavior, the Director/Floor Supervisor will be notified, and a determination will be made about the child’s enrollment at the center.
